10 Supplementary Figure 1

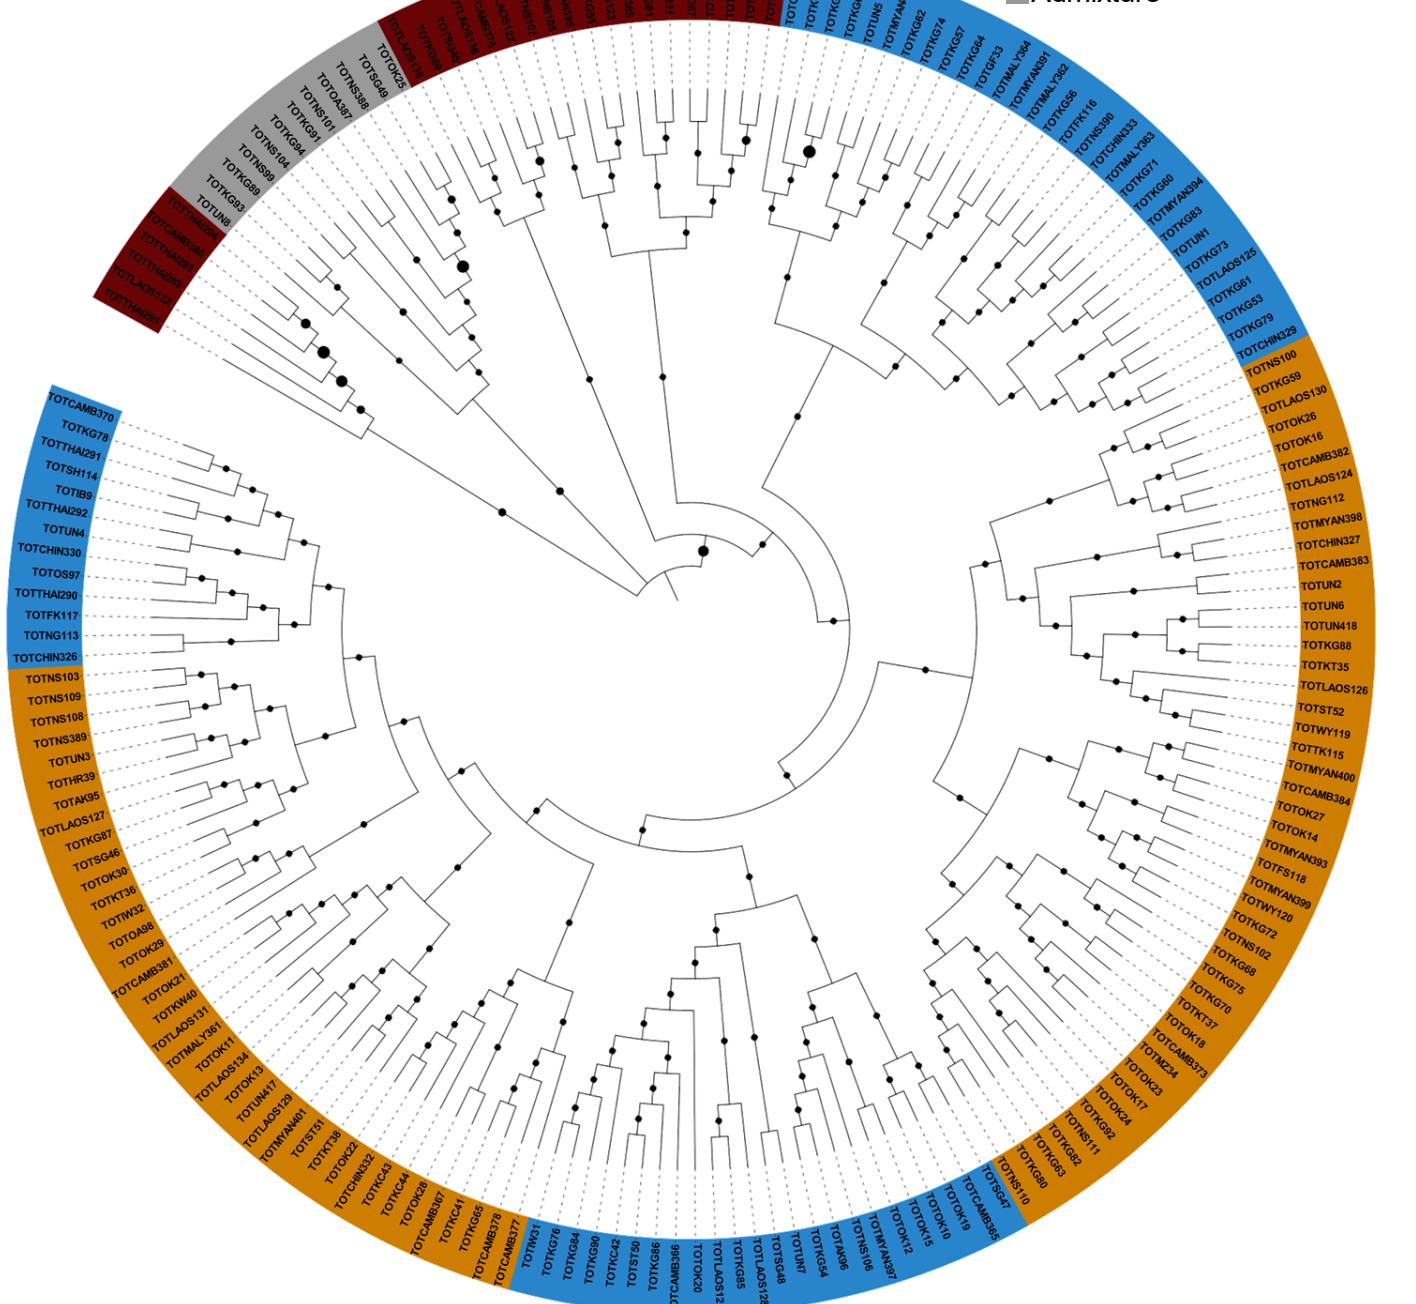

11

12 **Supplementary Figure 1.** Map showing the different regions of Asia, Africa, Europe,  
13 and Oceania from where cowpea germplasm was collected for assessing genetic  
14 diversity and divergence. The sample sizes are represented by a scale bar and  
15 numerical values as indicated on the regions. The map was generated using Excel.  
16

## Supplementary Figure 2

█ Southeast Asia  
█ East Asia and Southeast Asia  
█ Japan and Southeast Asia  
█ Admixture

**Supplementary Figure 2.** Maximum-likelihood phylogenetic tree illustrating the evolutionary relationships among 188 cowpea accessions from East Asia and Southeast Asia, based on 6,612 markers. The clustering pattern reflects the geographical and cultivar-specific origin or domestication. Colored branches indicate germplasm sources: red for Southeast Asia, blue for East Asia (Japan and China), and Southeast Asia, yellow for Japan and Southeast Asia, and grey for admixed individuals. Black dots indicate boot strap values ranging from 0 to 1.
